BAYRAM ANNAGURBANOV

SOFTWARE ENGINEER

+99361105022 annakurbanov02@mail.ru @byprogger

Stavropol, Russia

PROFILE

Software engineer building Android, iOS and web applications. Experienced in native and cross-platform development, from architecture and core features to testing and release.

SKILLS

Mobile

Kotlin, Java, Swift, SwiftUI, Jetpack Compose, Flutter, Dart

Architecture

Clean Architecture, MVVM, SOLID, Riverpod, Bloc, GoRouter

Data & APIs

REST, GraphQL, WebSockets, Drift, ObjectBox, Room, SQLite, Retrofit, Dio

Tooling

Git, CI/CD, Fastlane, Firebase, Sentry, testing

AI

AI APIs, LLMs, Codex, ChatGPT, MCP

LANGUAGES

Russian — Native

English — C1

SELECTED PROJECTS

AgroSpektr · Alumnin · ACVideo · TLauncher PE

CRM, messaging, streaming, Minecraft launcher | Android · iOS · Web

- Designed offline workflows with background sync; migrated architecture to Clean Architecture and Riverpod.
- Built real-time messaging and history sync, plus video playback with resume support.
- Reworked Minecraft content imports and APK installation with integrity and signature checks.

Legion · Dolka

Driver operations and loyalty program | Android · iOS

- Built trip tracking, photo reports and offline driver data storage with ObjectBox.
- Implemented digital loyalty cards, points history and promotional offers.

Carte Market

Online store | Web

- Built a responsive product catalog, search, filters, cart and checkout with REST API integration.

Quotes and Citations with AI · Zeegb · AI Photo Captions & Quotes

AI content and media editing | Android

- Built AI-generated quotes and image captions, with local storage and search.
- Implemented photo and video editing tools, media export and in-app subscriptions.

KAYAK

Travel search and booking | Android · iOS

- Improved search with pagination and caching; integrated payments and offline ticket access.
